

Mobile Access Control for... OnGuard®

Adds a mobile dimension to the Lenel® OnGuard, system, enabling a portable device to be an integrated component of the Access Control system and adding significant value to the security proposition.

Can be used for checking workers onto site, checking card validity, checking cardholder details, attendance at classes or events, mustering and roll-call, training, conformance and skills checking... anything a fixed reader would be deployed for and more besides.

EXPERIENCE

SMI has been developing and honing core competency in Mobile Product development for over 10 years.

RELIABILITY

- SMiHost is a PC/Server application which acts as a Virtual Panel in the OnGuard system. Handheld devices are setup in the OnGuard software in the same way and with the same characteristics as fixed readers.
- Readers can operate online via WiFi or Cellular communications, and can operate offline with data synchronized via USB, WiFi, Cellular or Ethernet connections.
- Choose data elements required and display layout with customizable templates

In depth integration with OnGuard software

- Supports Online and Offline Access Decisions, Occupancy, Anti-passback, Reader Online/Offline status, Segmentation, Mustering.
- Mobile devices are displayed in the OnGuard System Status tree as a fixed reader would be, with transactions and other messages displayed in the Alarm Monitoring screen, along with Associated Text which can include GPS coordinates and other relevant data from the reader.

Works for your environment

A range of mobile devices is available to accommodate most card technologies, operating environments and functional requirements, including recently released compatibility with NFC phones

SMI Global Ltd is a member of the Lenel OpenAccess Alliance Program (OAAP) since 2008. Lenel and OnGuard are registered trademarks of United Technologies Corp
