

# Mobile Access Control for... Honeywell Pro-Watch®

Adds a mobile dimension to Pro-Watch®, enabling a portable device to be an integrated component of the Access Control system and adding significant value to the security proposition.

Can be used for checking workers onto site, checking card validity, checking cardholder details, attendance at classes or events, mustering and roll-call, training, conformance and skills checking.... anything a fixed reader would be deployed for and more besides.

## EXPERIENCE

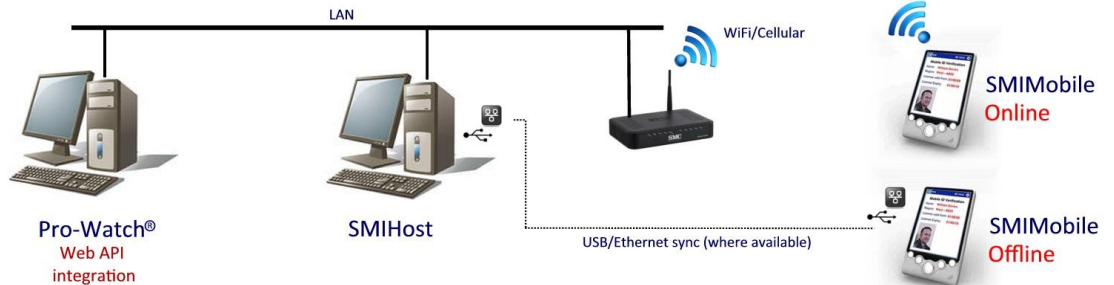

SMI has been developing and honing core competency in Mobile Product development for over 10 years.

## RELIABILITY

SMI's products and solutions are used in a wide range of industries, providing mission-critical reliability

## GLOBAL PRESENCE

SMI has products and solutions in over 40 countries around the world

- Handheld devices are setup in Pro-Watch® in the same way and with the same characteristics as fixed readers.
- Readers can operate online via WiFi or Cellular communications, and can operate offline with data synchronized via WiFi, Cellular or (where available) USB/Ethernet connections.

## In depth integration with Pro-Watch®
