

Mobile Access Control for... Symmetry™

Adds a mobile dimension to AMAG Technology's Symmetry, enabling a portable device to be an integrated component of the Access Control system and adding significant value to the security proposition.

Can be used for checking workers onto site, checking card validity, checking cardholder details, attendance at classes or events, mustering and roll-call, training, conformance and skills checking... most anything a fixed reader would be deployed for and more besides.

EXPERIENCE

SMI has been developing and honing core competency in Mobile Product development for over 10 years.

RELIABILITY

SMI's products and solutions are used in a wide range of industries, providing mission-critical reliability

GLOBAL PRESENCE

SMI has products and solutions in over 40 countries around the world
